ACCESS FERTILITY

IN PARTNERSHIP WITH

BuySperm
by SEMOVO

Donor sperm is often used in fertility treatments to help individuals or couples start a family when a partner's sperm isn't a viable option.

Donor sperm is commonly used in treatments like Intrauterine Insemination (IUI), In Vitro Fertilisation (IVF), or Intracytoplasmic Sperm Injection (ICSI) by same-sex female couples, single women, or in cases of male infertility, genetic conditions, or other medical concerns.

BuySperm offers patients identifiable UK-based sperm donors who have undergone stringent testing to ensure samples are high quality and safe for use.

We've partnered with BuySperm to help you spread the cost of donor sperm with our 0% interest finance option.

Find out more or discuss your options with our team.
